TIME MANAGEMENT

- 1 We should find time to enjoy life as leisure time is equally important, but it is becoming difficult to find time for ourselves. Time is either utilized in doing never-ending school work or it is often wasted in watching TV serials which take us nowhere. It is said if you want any work to be done, give it to the busiest person and he will find time to do it. But the one who has hardly any work to do will not be able to complete the assigned task. It is the world's busiest people who are able to develop exciting careers and still have leisure, as they are the best time managers.
- 2 Every minute has to be managed, hence do not crawl out of bed, instead charge out ! If you get up on time, half the battle is already won. Organize yourself. Twenty minutes spent on organizing and planning your schedule will save you an hour. Maintain a diary. You cannot remember everything. Note down the important things and let your mind be free for some creative ideas. Discourage friends who drop in to find out about homework, when they themselves were present in the class. Protect yourself from every minute stealing interruptions and you will accomplish the best.
- 3 When one period is over it is always wise to open any textbook or go through your notebook and check if you have done your correction work. Why waste time in making noise ? Learn to work while waiting too. Making the best use of every moment doesn't mean pushing yourself relentlessly. Breaking up your routine can help you to work faster and better. Exercise can also clear your mind and relax your body.
- 4 By simply managing your time efficiently, you will reap the full benefits. So get up and organize yourself as that is the key to success. Hard work alone cannot help !
