वार्षिक परीक्षा – 2019

विषय : हिंदी 'ब'

दिनांक : 22.02.2019  
कक्षा – नवमी

समय : 3 घंटे  
पूर्णांक – 80

## सामान्य निर्देश :

- इस प्रश्न पत्र के चार खण्ड हैं—क, ख, ग और घ।
- चारों खण्डों के प्रश्नों के उत्तर देना अनिवार्य है।
- यथासंभव प्रत्येक खण्ड के उत्तर क्रमशः दीजिए।

### खण्ड – 'क'

प्रश्न 01. निम्नलिखित गद्यांश को ध्यानपूर्वक पढ़कर पूछे गए प्रश्नों के उत्तर लिखिए—

उपभोक्ता के अधिकारों के साथ-साथ कुछ कर्तव्य भी होते हैं, जो उसके अधिकारों की सुरक्षा करते हैं। एक जागरूक उपभोक्ता होने के नाते हमें खरीदी गई वस्तु का बिल माँगना चाहिए। अधिकतर दुकानदार बिल माँगे जाने पर आनाकानी करते हैं और हम भी बिल माँगने पर अधिक ज़ोर नहीं देते। ऐसा करके हम अपने कर्तव्यों से मुँह मोड़ते हैं। हमें ऐसे उत्पादों को खरीदने से हमेशा बचना चाहिए, जिनके पैकेट पर लिखी भाषा हम समझ ही नहीं सकते। ऐसी भाषाओं में लिखे संदेश अथवा निर्देश जब हम पढ़ ही नहीं सकते, तो हम उन उत्पादों की उत्पाद तिथि तथा उसकी प्रयोग करने की अधिकतम अवधि किस प्रकार जान सकेंगे।

हमें वस्तु की गारंटी, क्वालिटी, आफ्टर सेल्स सर्विस और सबसे बढ़कर दुकानदार के व्यवहार पर विशेष रूप से ध्यान देना चाहिए। विज्ञापन की दुनिया वास्तविकता के आधार पर नहीं, बल्कि कल्पना एवं भ्रम के आधार पर चलती है, इसलिए उपभोक्ता को सतर्क रहकर भली-भाँति परखकर उत्पाद का चुनाव करना चाहिए। यह भी ध्यान रखें कि जिस वस्तु को हम खरीद रहे हैं, वह पर्यावरण को नुकसान न पहुँचाती हो। इसके साथ ही वह वस्तु बच्चों के स्वास्थ्य के लिए किसी भी रूप में खतरनाक नहीं होनी चाहिए।

- हमें कैसे उत्पाद खरीदने से बचना चाहिए ? (2)
- “ऐसा करके हम अपने कर्तव्यों से मुँह मोड़ते हैं।” वाक्य में हमारी किस कमी पर प्रकाश डाला गया है ? (2)
- उत्पाद का चयन पर्यावरण से किस प्रकार संबद्ध है ? (2)
- “विज्ञापन की दुनिया कल्पना और भ्रम के आधार पर चलती है।” का आशय स्पष्ट कीजिए। (2)
- प्रस्तुत गद्यांश का उपयुक्त शीर्षक लिखिए। (1)

प्रश्न 02. निम्नलिखित काव्यांश को ध्यानपूर्वक पढ़कर पूछे गए प्रश्नों के उत्तर लिखिए—

मेरा माझी मुझसे कहता रहता था,  
बिना बात तुम नहीं किसी से टकराना।  
पर जो बार-बार बाधा बनकर आए,  
उनके सिर को वहीं कुचलकर बड़ जाना।  
जान-बूझकर मेरे पथ में आती हैं,  
भवसागर की चलती-फिरती चट्टानें।  
मैं इनसे जितना भी बचकर चलता हूँ,  
उतना ही मिलती हैं ये ग्रीवा ताने।  
रख अपनी पतवार, कुदाली लेकर मैं,  
तब इनका उन्नत भाल झुकाता हूँ।  
राह बनाकर नाव चढ़ाए जाता हूँ।  
जीवन की नैया का चतुर खिचैया मैं,  
भवसागर में नाव बढ़ाए जाता हूँ।

- जीवन में आने वाली बाधाओं का प्रतीक किसे बताया गया है ? कवि उनसे किस तरह का व्यवहार करने की बात कहता है ? (2)
- ‘पतवार’ और ‘कुदाली’ किसका प्रतिनिधित्व करते हैं ? (2)
- कवि ने स्वयं को क्या कहा है और क्यों ? (2)

### अथवा

मैं तो वही खिलौना लूँगा,  
मचल गया दीना का लाल,  
खेल रहा था जिसको लेकर  
राजकुमार उछाल-उछाल।  
व्यथित हो उठी माँ बेचारी,  
था स्वर्ण-निर्मित वह तो  
खेल इसी से लाल, नहीं है,  
राजा के घर भी यह तो!

राजा के घर! नहीं, नहीं माँ,  
तू मुझको बहकाती है,  
इस मिट्टी से खेलेगा क्या  
राजपुत्र ही तू ही कह तो!  
फेंक दिया मिट्टी में उसने,  
मिट्टी का गुड्डा तत्काल,  
मैं तो वही खिलौना लूँगा,  
मचल गया दीना का लाल,  
मैं तो वही खिलौना लूँगा,  
मचल गया शिशु राजकुमार,  
वह बालक पुचकार रहा था  
पथ में जिसको बारंबार।  
वह तो मिट्टी का ही होगा,  
खेलो तुम तो सोने से,  
दौड़ पड़े सब दास-दासियाँ,  
राजपुत्र के रोने से।

**DELHI PUBLIC SCHOOL, BHILAI**  
**ANNUAL EXAMINATION – 2019**  
**SUBJECT – MATHEMATICS**

Class : IX  
Date : 25.02.2019

Max. Marks : 80  
Time : 3 Hrs.

**General Instructions:**

- All the questions are compulsory.
- The question paper consists of 30 questions divided into 4 sections A, B, C and D.
  - Section A comprises of 6 questions of 1 mark each,
  - Section B comprises of 6 questions of 2 marks each.
  - Section C comprises of 10 questions of 3 marks each.
  - Section D comprises of 8 questions of 4 marks each.
- There is no overall choice. However, an internal choice has been provided in two questions of 1 mark each, two questions of 2 marks each, four questions of 3 marks each and three questions of 4 marks each. You have to attempt only one of the alternatives in all such questions.
- Use of calculator is not permitted.

**SECTION – A**

1. Insert two rational numbers between  $\sqrt{2}$  and  $\sqrt{3}$ .
2. What is the distance of the point  $(0, -3)$  from the origin?

**OR**

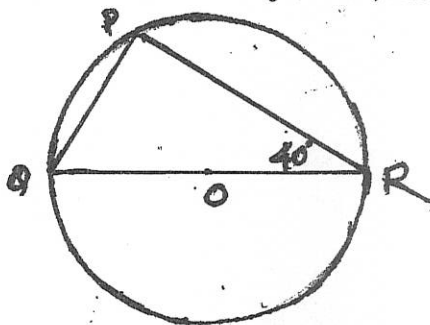

Name the quadrant / quadrants in which the ordinate of a point is negative.

3. Find the value of  $k$ , if  $(2, 1)$  is a solution of the equation  $2x + 3y = k$ .
4. A square  $ABCD$  and  $\triangle APB$  lie on the same base  $AB$ . If area of square is  $16 \text{ cm}^2$ , find the area of  $\triangle ABP$ , where  $P$  is a point on the side  $CD$ .

**OR**

A rectangle and a parallelogram are on the same base and between same parallels. If height of the parallelogram is 4 cm and length of the base of rectangle is 8 cm, find the area of parallelogram.

5. In the figure,  $O$  is the centre of the circle. If  $\angle PRQ = 40^\circ$ , then find  $\angle PQR$ .

6. The median of the following numbers arranged in descending order is 29. Find the value of  $x$ .  
40, 38, 35,  $2x + 10$ ,  $2x + 1$ , 15, 11, 8, 5

**SECTION – B**

7. In which quadrant or on which axis the following points lie?  
 $(-2, 3)$ ;  $(3, -2)$ ;  $(0, -1)$ ;  $(-4, -4)$

**OR**

Write the coordinates of a point.

- (i) above  $x$  – axis, lying on  $y$  – axis and at a distance of 6 units from the origin.
- (ii) lying on negative  $x$  – axis and at a distance of 3 units from the origin.
8. If the diagonals of a parallelogram are equal, then show that it is a rectangle.

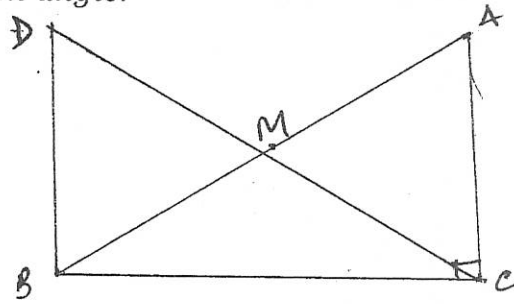

**OR**

Prove that the quadrilateral formed by joining the mid-points of the sides of a quadrilateral is a parallelogram.

9. In a Mathematics test given to 15 students, the following marks are recorded (out of 100) :  
41, 39, 48, 52, 46, 62, 98, 54, 40, 96, 52, 40, 42, 52, 60  
Find the mean and mode of this data.

Contd...2

18. In right triangle ABC, right angled at C, M is the mid-point of hypotenuse AB. C is joined to M and produced to a point D such that  $DM = CM$ . Point D is joined to point B. Show that
- $\triangle AMC \cong \triangle BMD$
  - $\angle DBC$  is a right angle.

OR

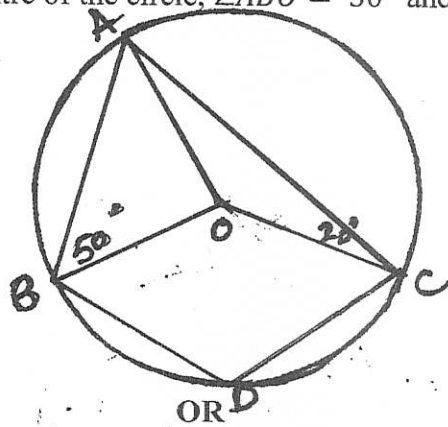

AB and CD are respectively the smallest and longest sides of a quadrilateral ABCD. Show that  $\angle A > \angle C$ .

19. If the non-parallel sides of a trapezium are equal, prove that it is cyclic.  
 20. Construct a  $\triangle XYZ$  in which  $XY = 7\text{ cm}$ ,  $\angle X = 75^\circ$  and  $XZ + YZ = 13\text{ cm}$ .

OR

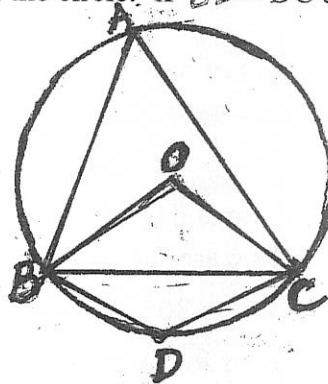

Construct  $\triangle ABC$  such that  $BC = 8\text{ cm}$ ,  $\angle B = 45^\circ$  and  $AB - AC = 3.5\text{ cm}$ .

21. In the given figure, if O is the centre of the circle,  $\angle ABO = 50^\circ$  and  $\angle ACO = 20^\circ$ , find the measure of  $\angle BOC$  &  $\angle BDC$ .

OR

In the given figure, O is the centre of the circle. If  $BD = DC$  and  $\angle DBC = 30^\circ$ , find the measures of  $\angle BAC$  and  $\angle BOC$ .

22. In a city, the weekly observations made in a study on the cost of living index are as follows:  
 Draw a frequency polygon for the data above. (Without constructing a histogram).

COST OF LIVING INDEX	NUMBER OF WEEKS
140-150	5
150-160	10
160-170	20
170-180	9
180-190	6
190-200	2
<b>TOTAL</b>	<b>52</b>

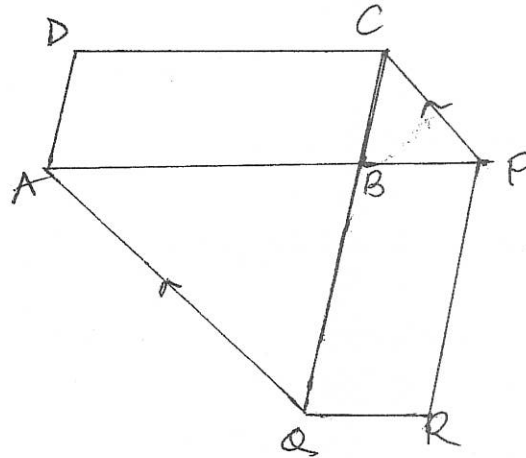

#### SECTION - D

23. Prove that  $\frac{1}{2+\sqrt{3}} + \frac{2}{\sqrt{5}-\sqrt{3}} + \frac{1}{2-\sqrt{5}} = 0$

Contd...4

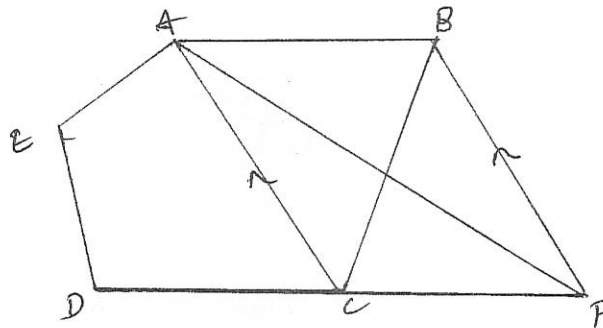

24. When the polynomials  $x^3 + 4x^2 - 11x - 26$  and  $6x^3 + 17x^2 + ax - 8$  are divided by  $x + 2$ , then remainders are same. Find the value of  $a$ .
25. The side AB of a parallelogram ABCD is produced to any point P. A line through A and parallel to CP meets CB produced at Q and then a parallelogram PBQR is completed. Show that  $\text{ar}(\text{ABCD}) = \text{ar}(\text{PBQR})$

**OR**

In the given figure, ABCDE is a pentagon. A line through B parallel to AC meets DC produced at F. Show that

- (i)  $\text{ar}(\text{ACB}) = \text{ar}(\text{ACF})$   
 (ii)  $\text{ar}(\text{AEDF}) = \text{ar}(\text{ABCDE})$

26. Twenty-seven solid iron spheres, each of radius  $r$  and surface area  $S$  are melted to form a sphere with radius  $r'$  and surface area  $S'$ . Find the ratio of  $S$  and  $S'$ .

**OR**

30 circular plates, each of radius 14 cm and thickness 3 cm are placed one above the other to form a cylindrical solid. Find the total surface area and the volume of the cylinder.

27. Construct a triangle  $XYZ$  in which  $\angle Y = 30^\circ$ ,  $\angle Z = 90^\circ$  and  $XY + YZ + ZX = 11 \text{ cm}$ .
28. A rhombus shaped field has green grass for 18 cows to graze. If each side of rhombus is 30 m and its longer diagonal is 48 m, how much area of grass field will each cow be getting?

**OR**

Find the area of a trapezium in which parallel sides are of lengths 5 cm and 11 cm, whereas the non-parallel sides are of lengths 4 cm and 6 cm.

29. A juice vendor has a large cylindrical vessel of base diameter 30 cm filled to the height of 32 cm with orange juice. The juice is filled in small cylindrical glasses of radius 3 cm up to a height of 8 cm and sold for ₹ 15 each. How much money the vendor receives after selling the juice completely?
30. Draw the graph of the equation  $4x + 3y = 12$  and find the coordinates of the points of intersection of the line with the coordinate axes.

**ANNUAL EXAMINATION – 2019**  
**SUBJECT – ENGLISH LANGUAGE AND LITERATURE**

Class : IX  
Date : 06.03.2019

Max. Marks : 80  
Time : 3 Hrs.

**General Instructions:**

1. The question paper is divided into three sections:  
Section A: Reading 20 marks  
Section B: Writing & Grammar 30 marks  
Section C: Literature & Supplementary Reader 30 marks
2. All questions are compulsory.
3. You may attempt any section at a time.
4. All questions of that section must be attempted in the correct order.

**SECTION A: READING (20 marks)**

**Q1. Read the passage given below:**

1. There was a time when Indians were the undisputed kings of hockey, led by a magician called Dhyan Chand who impressed the world with his skills. Dhyan Chand was famed for being a wizard with hockey stick in hand. In the Olympic Games at Amsterdam in 1928, India played against Austria winning 6-0, a match reported in detail at home. Already Dhyan Chand was being described as 'the world's greatest centre-forward'. After India's Olympic win at Amsterdam, a Dutch journalist wrote, "This is no longer the game of hockey. It is jiggling turn. It is beautiful." He added, "It was really thrilling to watch him in action. His game was full of beauty and great skill. The game the Indians played has played a significant part in reviving the game of hockey in Europe."
2. India continued the Amsterdam success at the next Olympiad in Los Angeles in 1932 recording a huge 24-1 win against the US, the biggest margin of victory at the Olympics till today and the Indians who beat Japan 11-1 easily went on to win the gold yet again.
3. In German Olympics, Dhyan Chand truly came into his own. He had discarded his stockings and spiked shoes and wore rubber sole shoes, which increased his speed very much. That he was at his best is proved by the way the Indians, beat the Germans 8-1 in the final at Berlin. Dhyan Chand himself scored six goals.
4. The German papers which until then had been predicting a German gold were full of praise for the Indians. A correspondent for the Morning Post argued, "These players glided over turf as if it were a skating rink and their flickering sticks had the Germans normally so quick, spellbound." The reporter went on to conclude, "Nature seems to have blessed the Indians with a special gift for hockey." Dhyan was an idol in the hockey world. Germany held him dear, calling their best hockey player, 'the German Dhyan Chand'. Hitler is said to have met Dhyan Chand personally offering him an officer's commission only if he would play for Germany.

**On the basis of your reading of the passage, answer any 8 of the following questions briefly: (1x8=8)**

- (a) What was Dhyan Chand famously called?
- (b) Where were the Olympic Games held in 1928?
- (c) What was India's achievement at Amsterdam?
- (d) Which winning record attained by India in the Olympics of 1932 has not been broken till today?
- (e) What change did Dhyan Chand make in himself in the German Olympics to increase his speed?
- (f) How did Dhyan Chand along with his team prove in Germany that they were the best?
- (g) What did the Germans call their best hockey player out of affection?
- (h) What offer did Hitler make to Dhyan Chand?
- (i) Pick the word from Paragraph 4 which means 'fascinated'.

**Q2. Read the passage given below:**

**(12marks)**

1. Every urbanite knows the bright lights of the city make it impossible to see the stars in a night sky. What most of us do not know is that those lights also may be making us sick. The cause is light pollution - the unearthly glow of billions of street lamps, security and porch lights, searchlights, office lights and signs - as people everywhere try to dispel the darkness of the night.
2. For the first time, light is being investigated seriously as a pollutant and a health hazard - a possible cause of increased incidence of breast cancer, depression and other ailments.
3. In the most heavily urbanized regions, it no longer ever really gets dark. Satellite images reveal that in large areas of Eastern North America, Western Europe, Japan and Korea, night has become a constant twilight. In a natural night sky, someone looking at the heavens should be able to see nearly 3500 stars and planets and the glow from the Milky Way, our galaxy. But in some brightly lit cities, the number of visible stars has dwindled to about a few dozen.

**Contd...2**

4. And for many wildlife species, light pollution seems to be as grave an environmental threat as bulldozed habitats and toxic-chemical dumping.
5. Lighting from office towers confuse migratory birds which fly into buildings lit up at night. Millions of birds in North America die from these crashes. Researchers have noticed since the 1980s that artificial lights along ocean beaches confuse millions of baby turtles. Observers say that the turtles instinctively crawl to the brightest thing on the horizon – normally the reflection of the moon on the sea. But where beaches are illuminated, baby turtles often crawl to the lit roads, where they are flattened by cars, or wander in circles on the beach. Once day breaks, they bake to death in the sun.
6. Canada has set up a conservation reserve north of Toronto, the first in the world to preserve a pristine night sky. Conservationists are hoping to expand the area of preserved night sky beyond the park's boundaries by encouraging local municipalities to curtail the use of poorly designed night lighting.
7. In the United States, the International Dark-Sky Association (IDA) has been campaigning for bylaws requiring 'night friendly' lights, where the bulbs recesses into the fixture so that the light does not glare out horizontally or upwards. Lamps that direct a light beam at the ground use less electricity and do not uselessly light the sky. While the health and environmental impacts of light pollution are starting to capture attention, Dave Crawford, the executive director of IDA, has other concerns too. He too worries that light may be making people sick and harming wildlife, but he says the fading of the heavens could also cause a fading of the human imagination - in many ways a greater long-term threat.

2.1 On the basis of your reading of the passage, answer any four of the following questions in about 30-40 words each.

(2X4=8)

- (a) How is light pollution a health hazard?
- (b) Besides light pollution, what are the other two grave threats to wild life?
- (c) How are sea turtles and birds in peril because of light pollution?
- (d) Mention two measures taken in Canada to reduce light pollution?
- (e) Name two advantages of using lamps that direct light *beams at the ground.*

2.2 Complete the following sentences : (any 2)

(2x1=2)

- (a) Night has become a constant twilight in countries like ..... and .....
- (b) ..... and ..... contribute to light pollution.
- (c) IDA stands for .....

2.3 Find words in the passage that mean : (any 2)

(2x1=2)

- (a) not natural (Para 1)
- (b) diminished (Para 3)
- (c) In its original condition, unspoilt (Para 6)

### SECTION B: WRITING AND GRAMMAR (30 Marks)

Q3. Children are the future of the nation. Schools and parents play an important role in moulding a child's personality.

Write an article on the topic 'Role of School in a Child's Life' in 120 words.

(8 Marks)

Value Points:

- Importance of school for a child
- The shaping of physical and mental health
- Development of the right attitude
- Character building
- Providing opportunities to develop talents in each child

OR

Study the visual given below. Imagine that one such child has joined your class. Write a diary entry in 120 words describing how you felt and how you plan to help him.

Contd...3

- Q4. Write a short story, in about 150-200 words. Also give a suitable title to the story. (10marks)**

Nelson Mandela once said, "The greatest glory in living, lies not in never falling, but in rising every time you fall." Write a short story about someone who failed at something but found the strength to get up, fight back and be successful.

**OR**

You move to a new house in a new locality. When you go to school and introduce yourself to your classmates they gasp in shock and horror when you tell them your address...

Write what happened after you mentioned your address.

- Q5. Read the passage given below and fill in the blanks by choosing the most appropriate words from the given options. Attempt any 4. (1x4=4)**

Bacon's essay 'Of Studies' deals Eg.with the benefits of studies for the individuals in their daily lives. From reading books to writing papers, study plays a (i)\_\_\_\_\_ role in a man's life making him (ii)\_\_\_\_\_, witty and experienced. The essay is enriched (iii)\_\_\_\_\_ intellectual wisdom and practical knowledge. (iv)\_\_\_\_\_, it is considered to be the most beneficial essay for the students and young individuals. Although the essay is (v)\_\_\_\_\_ of any emotions and colourful expressions, it is; nevertheless, a wonderful effort of teaching the readers about the importance of studying.

Eg. (i) in (ii) for (iii) with (iv) from

| (e) | (i) drained   | (ii) depleted | (iii) devoid    | (iv) deprived |

- Q6. The following passage has not been edited. There is an error in each line. Write down the error along with the correction in your answer sheet as shown in the example: Attempt any 4. (1x4=4)**

S.No.		Incorrect	Correct
	In addition for providing us with delicious honey,	Eg. for	to
(a)	the hardworking honey bees also helps in pollination.		
(b)	Hence, it is not surprising that there declining population,		
(c)	caused by climate change, habitat loss or microbial diseases		
(d)	has researchers scrambling to find ways to protecting		
(e)	the vulnerable insects who are so crucial to our existence.		

- Q7. Rearrange any four of the following words /phrases to make meaningful sentences. (1x4=4)**

Eg. watching T.V. /on Fitness/while you are/the following ways/the American

Council/suggests/to exercise

*The American Council on Fitness suggests the following ways to exercise while you are watching T.V.*

- the remote, /the channel/to change/get up/from the couch/instead of using
- the room/ during/walk up/the stairs/or around/and down/commercial breaks
- a treadmill/use/you watch/while/you can/T.V.
- and /also entertain/way/can /this/you/yourself/exercise
- tons of exercises/ missing a second of / in your living room/ you can do/ your favorite show/ without/ there are

SECTION C: LITERATURE (30 Marks)

**Q8. Read the extracts given below and answer the questions that follow. Write the answers in one or two lines only. (1X4= 4marks)**

No motion has she now, no force;  
She neither hears nor sees;  
Rolled round in earth's diurnal course,  
With rocks, and stones, and trees.

- (a) Name the poet and the poem.
- (b) Who is referred to as 'she' in the above lines?
- (c) Why doesn't 'she' have neither motion nor force?
- (d) What does the poet mean by 'earth's diurnal course'?

**OR**

I shall be telling this with a sigh  
Somewhere ages and ages hence:  
Two roads diverged in a wood, and I—  
I took the one less traveled by,  
And that has made all the difference.

- (a) Name the poem and the poet.
- (b) What do the two roads signify in the above lines?
- (c) What will the poet tell with a sigh?
- (d) Pick the word from the lines that means 'separated'.

**Q9. Answer the following questions in 30-40 words each. Attempt any 5. (2x5=10 Marks)**

- (a) What two 'important and earth shaking decisions' did the doctor take while he was looking into the mirror?
- (b) What does the patter of the rain on the roof remind the poet of?
- (c) How did Montmorency participate in the job of packing in the story 'Packing'?
- (d) What kind of a father was Mr. Macdonald? How was he different from Kezia's father?
- (e) What was Behrman's masterpiece? What makes Sue say so?
- (f) Why did the swallow not leave the prince and go to Egypt?

**Q10. Attempt any one of the following questions in 100-150 words. (8 Marks)**

Life is all about sacrifice and suffering. Do you agree? Justify with reference to Maria Sharapova.

**OR**

Give a brief character sketch of Vincent Charles Gerrard from the story 'If I Were You'. Also mention how Gerrard outwitted the intruder.

**Q11. Answer any one of the following questions in 100-150 words. (8 marks)**

What qualities did Ishwaran have as a good storyteller? How was he an asset to Mahendra?

**OR**

Give a brief character sketch of Bill Bryson from the story 'The Accidental Tourist'? Also mention his worst experience on the plane flight.

- Internal choices are there in Practical based questions in all three parts of the subjects.

**SECTION – A (PHYSICS) (27 Marks)**

- (1) Can an object simultaneously possess both kinetic and potential energy, if yes, give example. (1)
- (2) (i) Differentiate between kinetic and potential energy.  
(ii) An electric iron of 200W used for 30min daily, find electrical energy consumed in kWh for the month of April. (2+1=3)
- (3) What will happen to the gravitational force between the two objects, if-  
a) mass of one object is doubled?  
b) the distance between the two objects is tripled?  
c) masses of both the objects are doubled?  
Justify your answer with proper mathematical steps. (3)

**OR**

- (i) What is acceleration due to gravity? Find the expression for acceleration due to gravity of an object on the surface of earth.  
(ii) How the value of acceleration due to gravity changes when we move from Earth's Pole to equator? Give reason to support your answer. (2+1=3)
- (4) (i) Define Thrust and Pressure. Give their SI units.  
(ii) Why a camel walks easily on a sandy surface than that of a man, although camel is much heavier than a man? (2+1=3)
- (5) (i) State Newton's third law of motion.  
(ii) An object of mass 20 kg accelerated uniformly from a velocity of 36 km/h to 54km/h in 25sec. Calculate initial and final momentum and the force exerted on the object. (1+2=3)
- (6) (a) Draw velocity-time graph and distance-time graph for an object having uniform motion.  
(b) An aeroplane starts from rest with an uniform acceleration of  $3\text{m/s}^2$  and takes a run of 35sec before taking off. i) What is the minimum length of the runway? ii) With what velocity the plane took off?  
(c) In what situation we can say that the object is having negative acceleration. Explain with example. (2+2+1=5)
- (7) (a) Explain how ultrasound is used in industries to detect flaws in a metal block?  
(b) A man standing between two parallel cliffs fires a bullet. He hears echo after 1.5s and another after 2.5s. If the velocity of sound is 340m/s, find the distance between the cliffs.  
(c) What is echocardiography? (2+2+1=5)

**OR**

- (i) Differentiate between Longitudinal and Transversal wave  
(ii) Draw waveforms showing high pitch sound and low pitch sound with equal loudness.  
(iii) Define reverberation. Write any two methods to reduce reverberation. (2+1+2=5)

Contd...2

**PBQ**

- 8) The angle between the direction of incident sound wave towards the smooth wall and the direction of reflected sound wave from the wall is  $90^\circ$ . Find the values of the angle of incidence and angle of reflection. (2)

**OR**

Ravi, Suraj, Ritvik and Vasu wanted to establish a relationship between loss of weight of a solid with weight of water displaced by fully immersing it in tap water and in strongly salty water. After performing the experiment they noted their observation for same solid as follows,

Ravi : Loss of weight of solid is more in tap water.

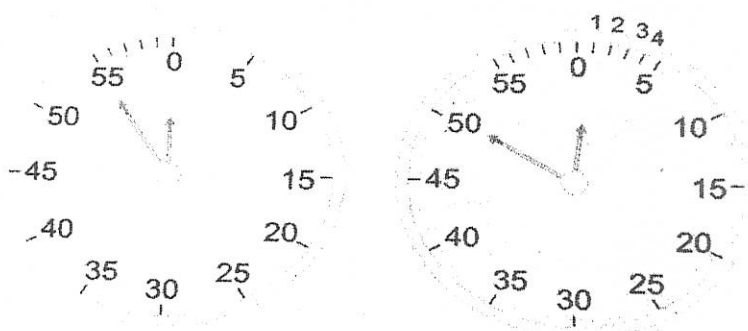

Suraj : Loss of weight of solid is more in strongly salty water.

Ritvik : loss of weight is equal both in tap and in strongly salty water.

Vasu : Loss of weight of solid may be more in tap water or in strongly salty water depends upon how deeply it is immersed.

Identify the correct observation. Give reason in support of answer. (2)

- 9) A transversal pulse created at one end of a 5m long string is observed to complete 6 returns journey along its length before fading out. The initial and final readings on the stop clock used in the experiment are as shown below. Find the speed of pulse through the string in m/s. (2)

**SECTION – B (CHEMISTRY) (26 Marks)**

- (1) If  $Z=3$ , what would be the valency of the element? Also name the element. (1)
- (2) Convert into mole (2)
  - (a) 12 g of Oxygen gas
  - (b) 20 g of water
- (3) (i) Write the formula of Aluminium Chloride. (3)
- (ii) Calculate the molar mass of Sulphur molecule,  $S_8$  (At. Mass of Sulphur = 32 u)
- (iii) What is the mass of 1 mole of Nitrogen ? (At. Mass of N=14 u)

**OR**

- (i) Define suspension
- (ii) Name the separation technique- (3)
  - (a) Oil from water.
  - (b) Ammonium Chloride from a mixture containing sodium chloride and Ammonium Chloride.
- (iii) Write two applications of crystallization.
- (4) (i) What is the physical state of water at (3)
  - (a)  $25^\circ\text{C}$  ,
