Dear Schools,

As you all know our flagship annual challenge - "The Marathon" is in its 3rd phase and we want all of you to participate in large numbers. For Phase 1 and Phase 2 combined we have received over 15,000 entries. Keep up the 'josh' and push yourself to shine through in this year's most unique and innovative challenge.

Last year's winners got a chance to meet the Hon'ble President of India at the Rashtrapati Bhawan. They also got a chance to improve their innovation in an incubator and receive mentorship and guidance from those that mentor India's top startups. This year is very different from all others; Starting from our problem statements which were given by you to the mode of submission which now includes Techno ART, we are innovating to push you to create and innovate better. Kindly note district-wise top innovators will also be announced for this year.

So hurry up and participate! **Phase 3 is only open till February 20th.**
