

DELHI PUBLIC SCHOOL, BHILAI (2016-2017)
CLASS 2
MATHEMATICS ASSIGNMENT NO. 5

SEQUENCE OF SEASONS

In India, there are five seasons in a year. Look at the table to get an idea about the occurrence of different seasons.

Months	Season	
November – February	Winter	
March – April	Spring	
May – June	Summer	
July – August	Rainy	
September – October	Autumn	

When do the different seasons occur in your city? Write the month(s) against each season.

Look Around

Same seasons occur in different months in different countries. Write the names of five countries where the season now is the same as in your country.

In India we mainly have these seasons:

Winter, Spring, Summer, Rainy and Autumn

Fill in the blanks:

1. The winter season comes after _____.
2. The summer season comes before _____.
3. _____ occurs between the winter and summer.
4. The _____ season occurs in July and August.
5. Name a festival that you celebrate in these seasons:
 - a. Spring: _____
 - b. Winter: _____
6. We wear woolen clothes in _____ season. (winter/summer)
7. The most suitable season to eat ice-cream is _____. (winter/summer)
8. I go out with an umbrella in _____ season. (rainy/winter)

😊 **ALL THE BEST** 😊
