1. Ayurveda in Sanskrit means 'life- knowledge' or 'science of life'. It is a system of medicine that originated in the Indian subcontinent more than 5000 years ago. The ancient Vedic literature by sages has clearly laid out instructions to maintain health as well as fighting illness through therapies, massages, herbal medicines, diet control, and exercise. Now modernised practices derived from Ayurveda are popular all over the world and are known as Alternative Medicine. The primary goal of Ayurvedic medicine is to help people live long, healthy and balanced life without the need for prescription drugs, complicated surgeries or suffering through painful conditions.
2. Ayurveda is based on the belief that health and wellness depend on a balance between the mind, body and spirit. Its main goal is to promote good health, not fight diseases. So, a patient's approach, attitude and conduct are often responsible for causing him health problems. Ayurveda believes that a negative attitude or a negative thought can affect mental as well as physical health. It also believes over eating or excess fasting and lack of activity and over exertion is harmful for the body and leads to disharmony and disease. Therefore, the practice of yoga, meditation and attention towards one's conduct are an integral part of the Ayurvedic treatment. But treatments may be geared towards specific health problems.
3. Ayurveda is witnessing a great revival worldwide with thousands of people looking for a holistic, sustainable, safe and effective form of treatment. Until just a few decades ago, modern science had not studied the role of diet and lifestyle in the manifestation and management of diseases. On the other hand, Ayurveda has been doing so, for thousands of years. Consequently, the Ayurvedic system has achieved expertise in the role of food and lifestyle in diseases.

1. If I were a voice, a persuasive voice,  
that could travel the wide world through,  
I would fly on the beams of the morning light,  
And speak to men with a gentle might,  
And tell them to be true.
2. I would fly, I would fly over land and sea,  
Wherever a human heart might be,  
Telling a tale or singing a song,  
In praise of the right – in blame of the wrong.  
If I were a voice, a consoling voice,  
I would fly on the wings of air,  
The home of sorrow and guilt I would seek
3. And calm and truthful words I would speak  
to save them from despair.  
I would fly, would fly over the crowded town,  
And drop, like the happy sunlight, down  
Into the hearts of suffering men,  
And teach them to rejoice again.

4. I would fly, I would fly on the thunder crash,  
and into their blinded bossoms flash,  
And, all the evil thoughts subdued,  
I would teach them brotherhood.  
If I were a voice, an immortal voice,  
I would speak in the people's ear,
5. And whenever they shouted 'liberty'  
without deserving to be free,  
I would make their error clear,  
I would fly, I would fly on the wings of day,  
Rebuking wrong on my worldwide way,  
And making all the Earth rejoice.  
If I were voice - an immortal voice.
