A1. Read the passage given below and answer the questions that follow: (08)

A fictional character is an imaginary character created for movies, novels, plays, operas etc. Many fictional characters have been entertaining us for several years. Many of them inspire us a lot. We all have loved to watch Donald Duck, a cartoon character, Byomkesh Bakshi; an Indian fictional detective etc. And there are many others. Sherlock Holmes was one of such great and interesting characters.

Sherlock Holmes was a fictional detective created in London by Sir Arthur Conan Doyle, a Scottish author and physician. Sherlock Holmes gained a huge popularity all over the world. He is always remembered as a very wise detective. He was a man of astute logical reasoning and acute wisdom. He could solve any and all kind of criminal cases. He would often get any false appearance or 'disguise' to confuse people.

This helped him in solving complex situations. He was very devoted to his work. Sometimes he would not even eat his breakfast until he got the clues he wanted. Sherlock Holmes had above average physical strength. He always carried a stick with him. He was a chemistry student, but had no knowledge of many other subjects too. He was expert at boxing, martial arts etc. He could play violin well.

His friend John Watson describes him as a 'strange' person. He says that Sherlock had a 'cat-like' love for cleanliness because he did not like anybody's company except his friend. But he would be pleased if somebody praised or flattered his skills. Here his friend's remark 'strange' is justified.

Sherlock Holmes first appeared in a novel 'A Study in Scarlet', in 1887. His second novel was 'The Sign of the Four'. But readers actually started loving him since 1891, when he came in a series of short stories in 'The Strand Magazine'.

Most of his stories are in the words of his friend Watson. The Adventure of the Blanched Soldier, The Adventure of the Lion's Mane, 'His Last Bow', are some of famous stories about Sherlock Holmes.

Freedom is the right to do  
Anything that pleases you,  
As long as you keep in sight  
That others also have a right.  
Have you the right to kill a cat?  
Oh no! It's wrong, just consider that  
The cat has the right to live like you  
A right to eating and drinking too!  
So remember that it's certainly wrong  
To deprive a nightingale its song,  
To rob the innocent, as robbers do.  
To injure someone to win a race  
To despise some and others embrace,  
To disobey every order and rule  
And drown a swimmer in the pool,  
And shout and scream like a fool  
Disrespecting the teachers in the school.  
So never forget that although you are free,  
You should think of others, not only 'ME'.

1. According to the poem, what is freedom? (1)
2. How are the rights of a cat similar to ours? (1)
3. Who robs the innocent? (1)

Amoeba feeds on some microscopic organisms. When it senses food, it pushes out pseudopodia around the food particle and engulf it. The food becomes trapped in a food vacuole. Digestive juices are secreted into the food vacuole. They act on the food and break it down into simpler substances. Gradually the digested food is absorbed. The absorbed substances are used for growth, maintenance and multiplication. The undigested residue of the food is expelled outside by the vacuole.
